

Integrated Cloud-based Solution for Safety, Health & Risk Management

For an AU-based OHS Software & consulting company maintaining qualifications in the field of OHS, Ergonomics, Risk Management, Auditing and Business Management

PROJECT OVERVIEW

The Australian client required an integrated platform to provide his customers with required organizational safety to be managed at multiple worksite locations and transient workers. We created a scalable and comprehensive mobile solution to manage safety, risk & compliance requirements.

Capability
Cloud

Industry
Healthcare

Country
Australia

KEY FEATURES

An integrated mobile and web-based safety management software solution that supports businesses with effective management of their safety, risk and compliance issues

▶ **Mapping of health & safety compliance standards**

Eliminated the risks by adhering to standards like AS/NZS 4801, AS/NZS ISO 14001, AS/NZS ISO 31000, AS/NZS ISO 9000 and AS 1885

▶ **Unified business processes**

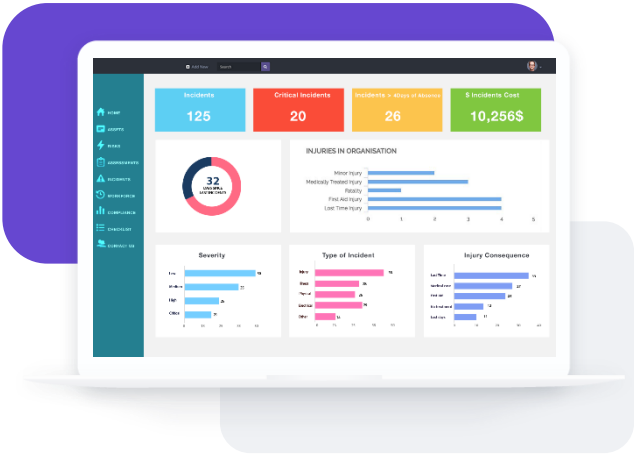

Single platform to streamline audit compliance, risk, training and document management over a single dashboard

▶ **Custom training modules**

Offers easy configuration of training schedules as per the requirement accessible on a variety of devices like smartphone, desktop and tablets

▶ **Workflow automation**

High level of accuracy and transparency for leadership team across levels on health and safety practices adherence

CHALLENGES

- ▶ Inaccurate registration of safety risks and hazards
- ▶ No form of worker competency and language matrix
- ▶ Lack of multi-site management to engage teams across different locations
- ▶ Inaccurate compliance report generation

SOLUTION

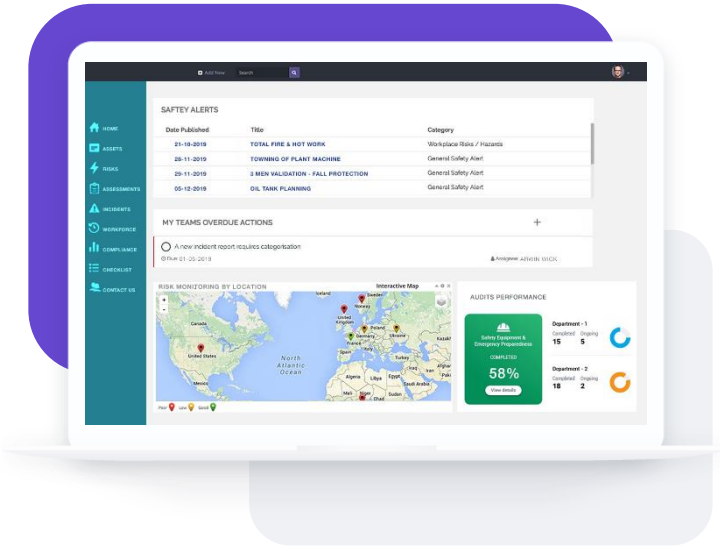

The SaaS based health & safety risk management application today helps organizations resolve health & safety risks by automating the workflows, eliminating compliance paperwork, and engaging workers with active participation to minimize the business risk exposure

▶ Role-based access

To ensure confidentiality, the security of information and data, the level-based access rights and permission to the various modules provide a high level of data integrity

▶ Incident reporting & management

Tools for quick reporting notify top management, prompts investigation, and suggest corrective actions through the centralized database. It ensures confidentiality around your incident reporting and investigation process and further assigns an investigator to the incident and closely monitors the status

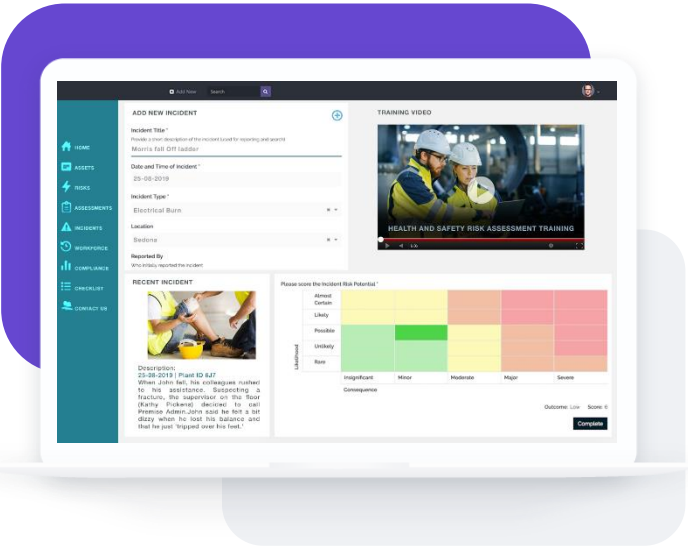

▶ Workplace safety inspections & compliance logs

Assign and schedule inspections for monitoring the progress along with enabling corrective actions, with custom registers for hazardous chemicals, plant, manual tasks and contractors to assist with managing compliance, all through a unified platform

▶ Training management

The workplace training management program ensures that employees have the competency, skills and knowledge for the duties they have been assigned with. It aims to meet Legal Compliance requirements that play an essential role in the health and safety of workers.

TECHNOLOGIES & TOOLS

BENEFITS

40%

increase in worker participation

28%
